Thinking
beyond
the box.

1988

A Star is Born

Garic, originally Shuttleworth Plant Hire, incorporated as a business on 12th Feb, 1988.

1995

Effective Design

World patent claimed on the Interceptor Drip Tray.

2002

Award Winning Solar Loo

Green Apple Award recognises Solar Loo, promoting global environmental best practices.

2003

Welfare Van Launch

Garic develop and launch the innovative Welfare Van.

2011

Armadillo Eco Launch

Each eco welfare unit is solar powered and backed up by a bespoke 12v super silent generator.

2015

Combi Cabin Eco Series+

Launch of the industry's most environmentally friendly welfare unit.

2015

Product of the Year Award

Eco-friendly Armadillo variant launched, blending sustainability with robust design.

2017

Award Winning

Awarded FORS Gold for the first time.

Beyond welfare

In 1988, two entrepreneurs named Gary and Eric created a business that was to significantly change site welfare in this country. They took a view based on the long game with products designed to perform over many years with minimum servicing and maintenance - and to deliver a market-leading customer experience.

Since then, Garic has evolved its products and services to meet the changing needs of our customers. Our vision for the future is to reduce the environmental impact of building and construction.

It is centred around removing your risk, making it easy for you to manage environmental and operational benefits.

We're combining our years of experience and expertise with technology to offer a specialist range of complementary sustainable site solutions.

Our commitment to SBTi targets puts environmental considerations at the heart of everything that we do. Sustainable site solutions combines this commitment to create an outcome-focused business based on collaboration and integration.

We understand how your world is changing and so we're putting ourselves in your shoes and asking how we can help you. We provide solutions that enable you to deliver your objectives:

Welfare Solutions continues the development and growth of our extensive range of market-leading and innovative temporary site welfare and related products and services, together with carefully selected partners. We're extending this to include emotional and physical wellbeing, personal protection and compliance management.

Energy Solutions encompasses our sustainable and innovative Microgrid power generation capability combined with proactive energy management through sensors, software and the provision of performance data. Microgrid can be deployed as part of an integrated welfare set-up or as part of a stand-alone solution.

Environmental Solutions builds on the continued success of our tanker and fuel management services and includes risk and compliance management as well as air quality and noise monitoring.

We're thinking beyond the box.

2019

Hybrid Welfare Van Launch

Hybrid van integrates cutting-edge technology, enhancing welfare, environment, and on-site safety.

2020

Solar Loo Twin + Shower, Solar IBC & Wash Stations

Further expansion of our Eco range and hygiene solutions.

2021

Combi Cabin Eco 1.5 & Armadillo Halo

Developing the Combi Cabin Eco 1.5 & Armadillo Halo launched.

2022

Armadillo Eco 4.0 & Armadillo XL+ Eco 4.0 Launch

A new sustainable Armadillo is launched in two sizes.

2022

Hybrid Welfare Van 2.0 Launch

An advanced welfare van is launched along with our online Eco Estimator.

2023

New Sustainable Innovations

Launch of the Solar Power Frame, Solar Energy Store, Battery Energy Store, and Microgrid.

2023

H&E Award Winner

Best Sustainability & CSR Initiative for our outstanding Project Compass.

2024

The Evolution of Garic

Sustainable Site Solutions, including **Welfare Solutions**, **Energy Solutions**, and **Environmental Solutions**.

Serious about sustainability

It's how we'll minimise the environmental impact of building and construction.

By becoming your partner of choice for sustainable site solutions.

Making it easier for you to work more sustainably.

With truly sustainable solutions for your site welfare, environmental, and energy generation needs.

Sustainable site solutions

Our sustainable solutions are designed to provide the most environmentally friendly and cost-effective combination of expertise, products, services and technology through the life of your project. As your requirements change, our sustainable site solutions flex so that our solution always provides what you need, when you need it. We can apply our sustainable site solutions anywhere within your site based on the products and services we offer within welfare, energy and environmental solutions – or any combination of these.

It also ensures that our products deliver tangible benefits to our customers in terms of environmental and cost performance.

Sustainability defined

Sustainability has several meanings to us. It drives everything we do, whether it's defining the products we bring to market, setting our innovation strategy, governing our environmental agenda, or guiding the business decisions that we make.

For products, sustainability directs both how we build them and how they're used. It influences our choice of materials and our circular economy approach to repurposing older assets into new, better performing ones.

Similarly, our innovation framework seeks solutions that address today's needs while paving the way for tomorrow's opportunities. Our approach is designed to create new paths and set industry standards that resonate with our purpose, vision and mission.

Under our award-winning "Compass" initiative, we've also set challenging targets in four key areas:

Environment

Net Zero Total Emissions by 2040.

Community

1,000 colleague days given to the community every year.

People

Colleague engagement score in the top quartile of surveyed companies.

Customer

Maintain a market-leading NPS score.

Sustainability is about more than box ticking. That's why we're thinking beyond the box.

Welfare Solutions

Garic helps you support and protect your teams with market-leading welfare units and services that reduce risk and make it easier to manage compliance.

We'll help you to look after the wellbeing of your teams. Going beyond the box to deliver a whole range of welfare solutions to support every member of your team.

Because when your people feel safe and valued, you'll deliver on your promises.

3k+

welfare assets available

We provide temporary on-site welfare with one aim – to make sure that your teams can do their best for you every day.

A uniquely flexible combination of environmentally friendly welfare products that can accommodate the needs of the smallest to the largest site.

Compliance

The CDM Regulations 2015 set out minimum welfare facilities for construction sites and we make it easy for you to achieve compliance through every stage of your project. We can also advise on HSE guidelines and help you to deliver best practice on site.

It's important that your teams feel safe and valued while they're working on site, and that's why our units are among the best-performing and most comfortable in the industry. We can even monitor the environment within our solutions to ensure optimum performance.

We're working with partners to provide stand-alone and integrated CCTV solutions into our welfare offering to help you keep your people and property safe.

Our range of male and female sanitary products and services help to ensure your people feel at home on site, as well as supporting your workforce diversity.

Mobile Solutions

Mobile welfare solutions that cater for up to 10 people in a single unit are available in a variety of configurations, meaning that we can accommodate your needs in the hardest-to-reach locations.

Static Solutions

A flexible and extensive range of static solutions, available in almost limitless configurations, can accommodate anywhere from 10 to more than 90 people within any footprint to suit your site's location and conditions.

Site solutions that go beyond welfare to provide comfort, safety and security.

Energy Solutions

We help you manage your energy needs and reduce your operating costs.

With our expertise and technology, we help you manage the whole life of your project, with solutions that change with your project needs – as well as the seasons.

Achieving your sustainability goals without compromising your performance.

1.2k+

tonnes of carbon saved annually

90%

reduction in emissions

100%

of our energy solutions have telemetry included

We offer scalable energy solutions, from power generation to monitoring and control, that cut your emissions and costs.

Our energy solutions are centred around our Microgrid - an innovative energy management solution that's available as either a stand-alone solution or integrated into configurable welfare solutions. It's flexible too, providing energy from small-scale sites to medium and much larger installations.

Microgrid comprises several plug and play components, including the Solar Power Frame, Battery Energy Store, and stand-alone Solar Energy Store or integrated Combi Cabin 24 Eco. This modular design means that we can tailor our energy solution precisely to your site's size, shape, and energy demands. Regardless of configuration we can provide a solution that guarantees both cost and environmental benefits when compared with conventional approaches.

We understand that your energy needs can change over time on any site, and Microgrid ensures we can always adapt to those demands. Energy management information, available in real-time, means that we'll always offer you optimised solutions for your site conditions and recommend adding or removing components as necessary.

As a stand-alone solution, Microgrid can be used with your existing welfare units ensuring a consistent and reliable supply of energy to connected units. The system works with any site configuration, including stacked units.

However you choose to use it, Microgrid is proven to reduce your operating costs and emissions.

Energy solutions that go beyond power generation.

Environmental Solutions

We make it easy for you to reduce your environmental impact.

Our environmental solutions stretch far beyond green products to include planning, sustainability guidance and compliance management.

Show the world that sustainability isn't about ticking a box.

It's about going beyond it.

365k+

Litres of fuel delivered in 2023.

7.1m+

Litres of water replenished.

8.8m+

Litres of effluent waste collected.

A range of products and services that make it easier for you to protect your people and the environment while staying compliant.

Our in-house servicing team provides waste management, water refills and consumable supplies on an ad-hoc or regular planned basis. As well as servicing our own units we're able to support those of almost any other manufacturer or supplier.

We also make it easy for you to manage on-site compliance through full end-to-end auditability of our tanker services for clean water in and dirty water out.

If you're operating any worksite, you have specific legal responsibilities for maintaining the cleanliness of public roads and a duty of care to neighbours.

Our range of wheel washers helps you to comply with legislation as well as prolonging the life of your vehicles.

In addition, we can offer external air quality and noise monitoring as well as dust suppression equipment to help minimise risk to your teams on site and disruption to local communities.

Choosing us is choosing a long-term partnership, one that'll support you for the whole length of your project. By servicing your welfare units and your plant, we'll keep your site running smoothly while you focus on delivering for your customers.

Sustainability that goes beyond box ticking to deliver real change.

Making your life easier

By focusing on understanding and solving your problems, we're letting you focus on what's really important to you and your customers - successfully delivering your projects.

We're helping you operate sites that comply with all relevant legislation and HSE guidelines.

We're removing risk from your day-to-day on-site operations.

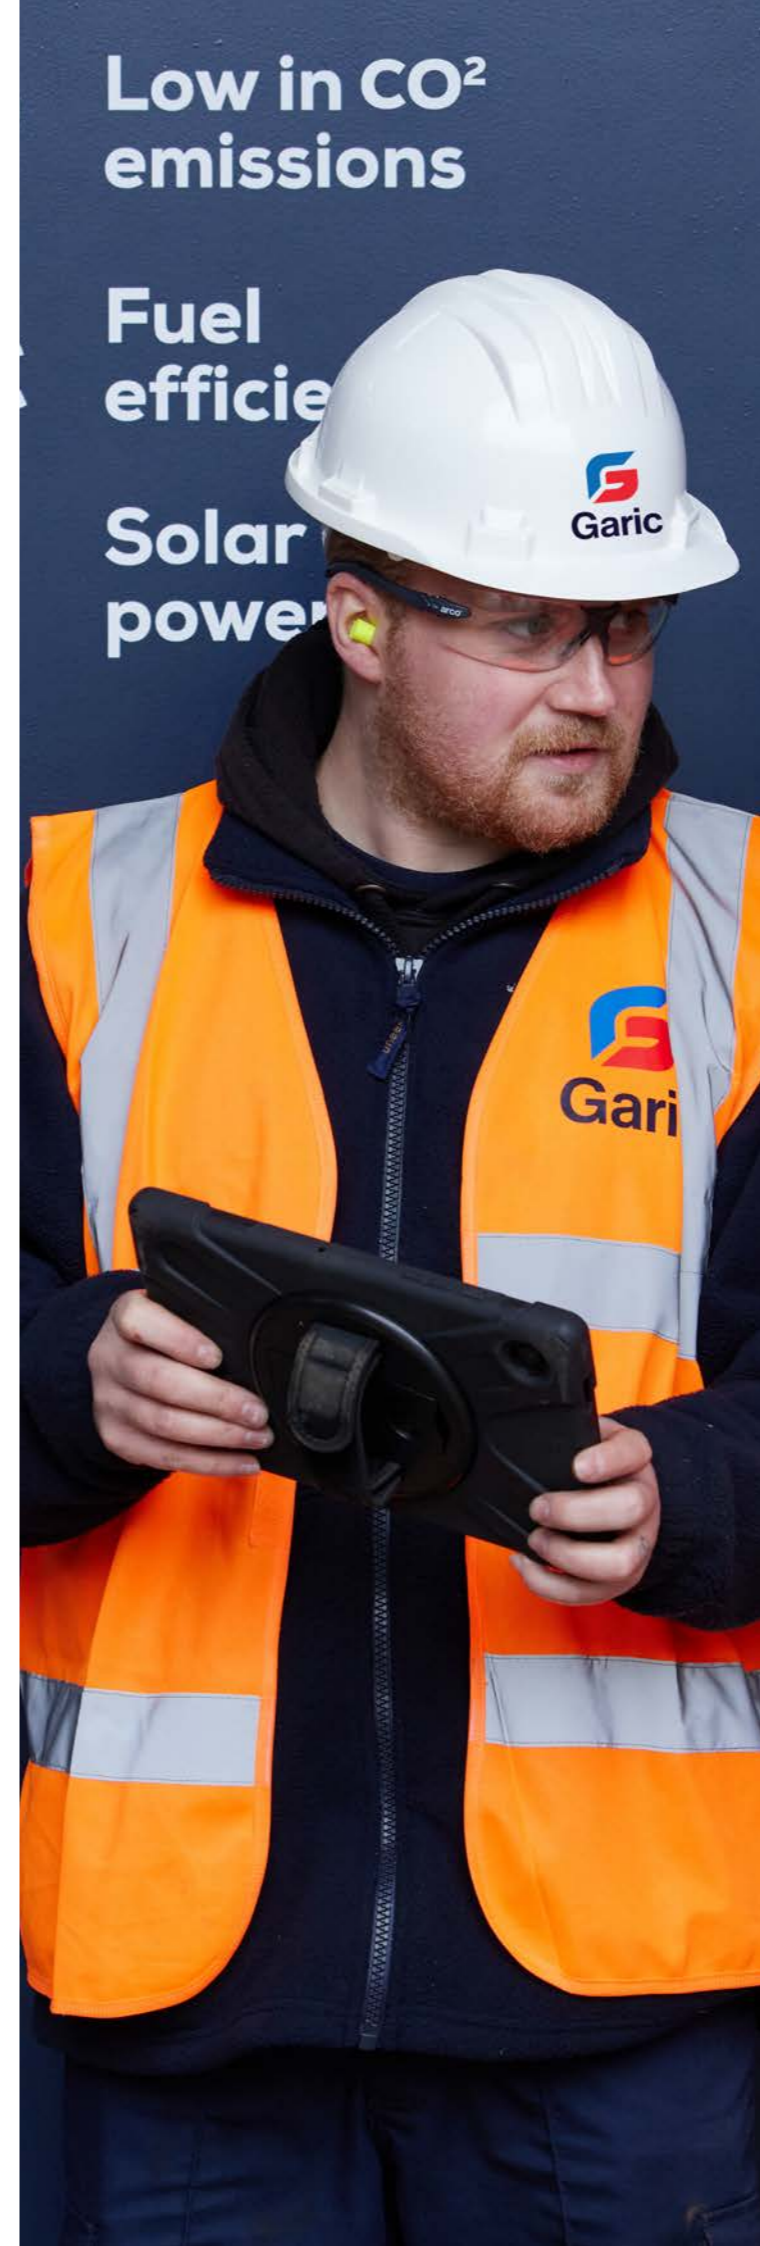

We're providing real-time performance data enabling you to make more efficient decisions.

We're saving you money and helping you to have a more positive environmental impact.

Outcome-driven solutions

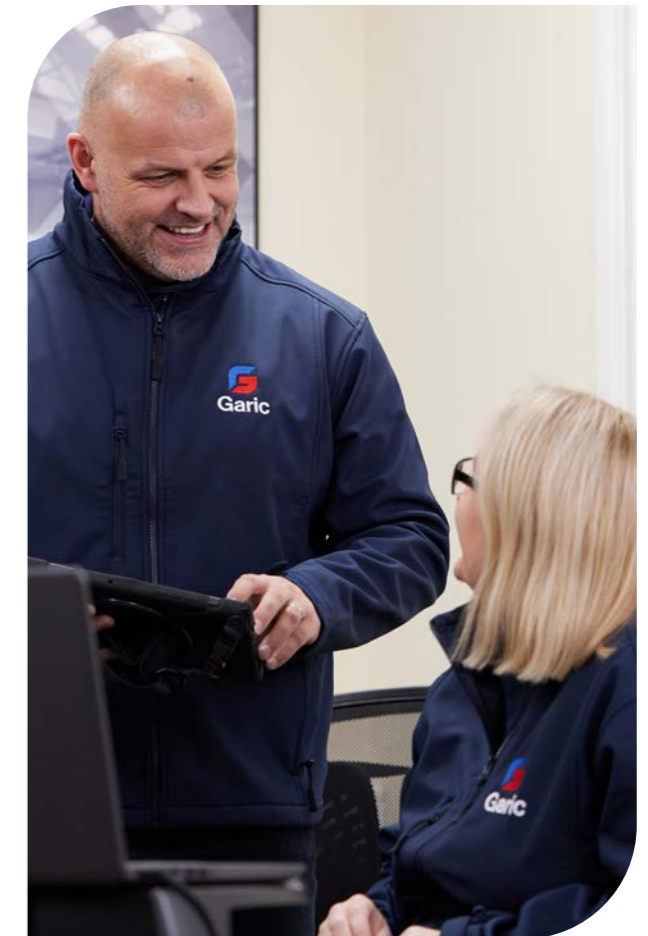

Because we're trying to see things from your perspective our approach starts and ends with you. We want to understand how you feel and what causes anxiety among your on-site teams. We'll use this understanding to make your life easier so that you can focus on delivering your project outcomes.

Planning & logistics

Our site design and installation team can help you plan your site layout prior to installation. This ensures that you maximise the available space while minimising your operating cost, as well as environmental and carbon emissions. With our in-house transport fleet and appointed persons, we really can offer an end-to-end service.

Garic has helped thousands of customers like you deliver their projects successfully for more than three decades. We'll share our experience with you so that you can share in that success.

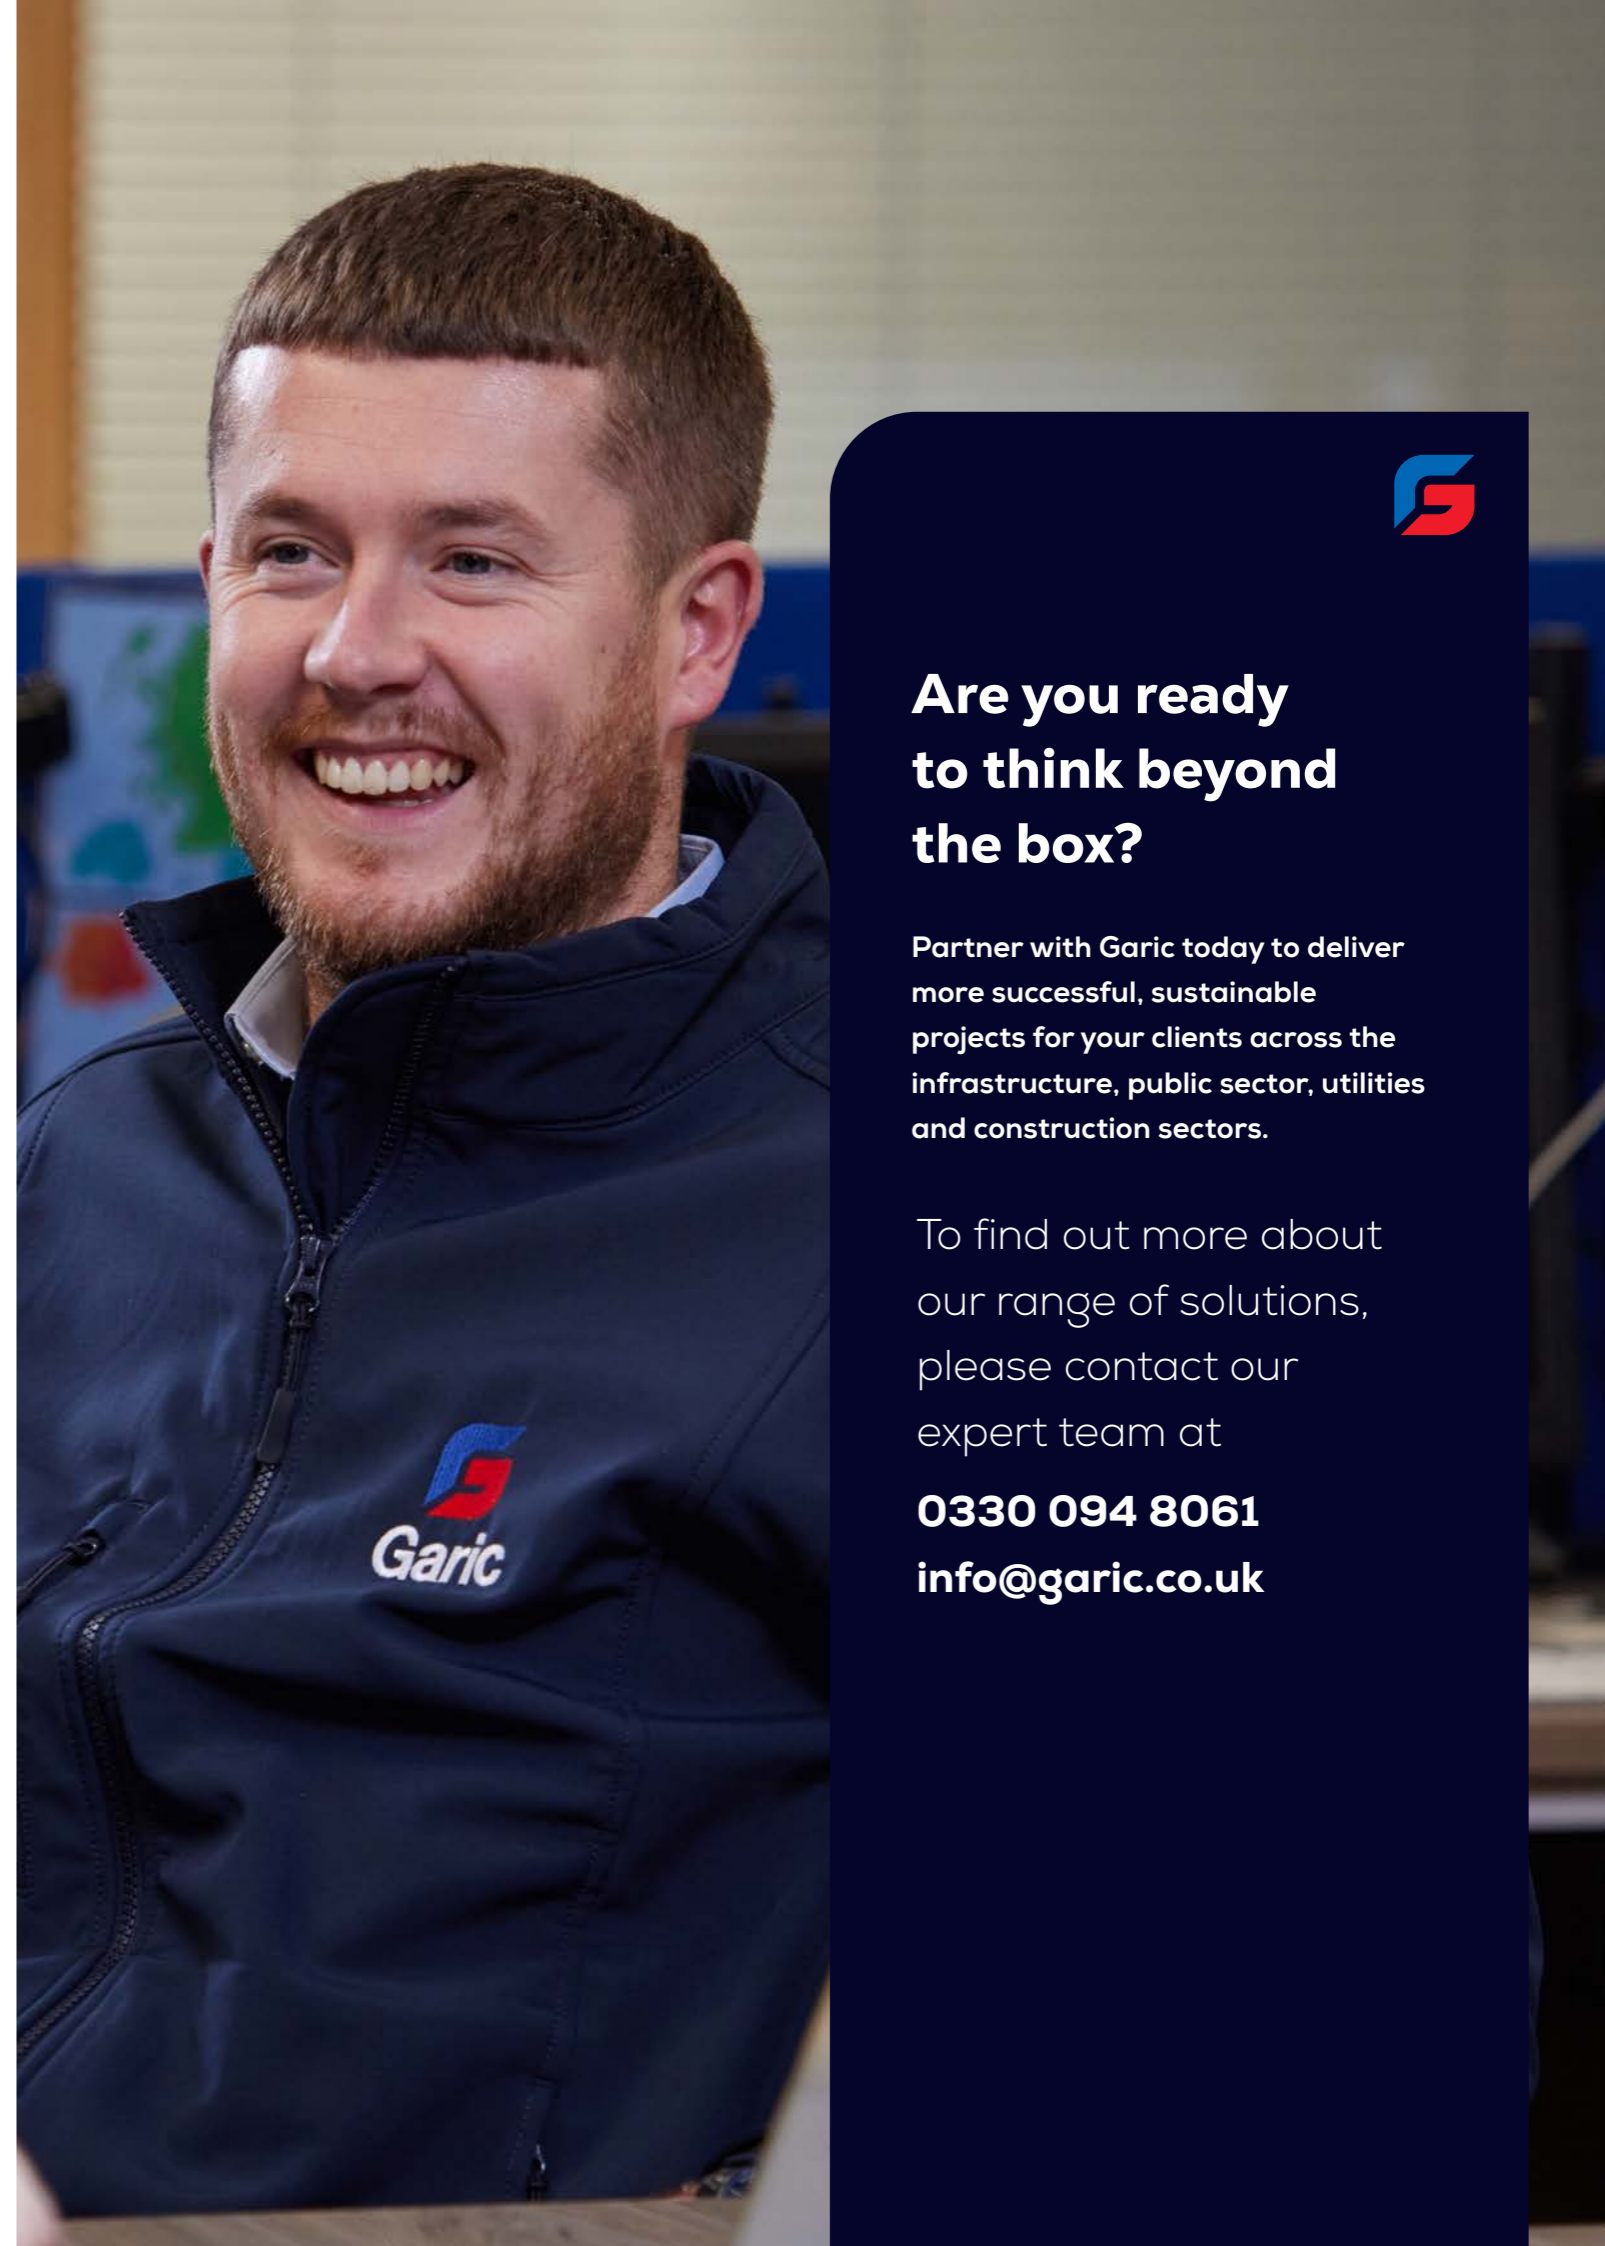

Why partner with us?

Technology and digitalisation are rapidly defining what our collective future will look like. Data from connected assets is already helping us to improve product performance and influence on-site behaviour. We can provide you with real-time access to this data so that you can proactively manage your sites and make more informed, more timely decisions.

The world is changing so fast that it's created a challenge none of us could have imagined even five years ago. We don't know all the answers but we do know that our ability to respond depends on harnessing our collective strength. We believe that this lies in true supply chain collaboration, creating value-add solutions that are greater than the sum of their individual parts.

We're on an exciting journey and we'd like you to be part of it. Through your feedback and collaboration we'll shape our future together so that you can help us to help you become even more successful.

Are you ready to think beyond the box?

Partner with Garic today to deliver more successful, sustainable projects for your clients across the infrastructure, public sector, utilities and construction sectors.
